

BEDDELEEM

JB ABSORB WALL

Room acoustics is a hot topic. Open-plan offices, concentration areas: all benefit from a balanced reverberation time. JB ABSORB WALL provides a range of wall solutions which enable the end user to provide sufficient absorption.

This translates to wall systems which can be used from the outset of the concept and we also provide cassettes which can be installed later on.

Assembly

Absorbent products from wood, metal and/or material with an absorbent core.
